- Senior Technical Advisor to Iranian Graduate Institute
- Technical Supervisor of the Innovation and Prosperity Funds of the Vice President of the Presidency

Technical courses and specialized courses

- Course ISO 90001
- Training course on quality control of rubber parts
- ISO 90001 Documentation Course
- Cost Quality Course(COQ)
- Level I value Engineering Course
- EFQM Training Course
- Provider Quality Assurance Training Course (SQA)
- FMEA Training Course
- English technical training course
- Non-operating industrial defense training course
 - APQP Projection and Development Training Course
 - Training course for developing a roadmap for industrial design technology
 - Training Course on Commercial and Military Vessels
 - Defense Co-Op Training Network (Optional)
 - A technical evaluator training course based on the EFQM Excellence Model
 - Qualitative Management Quality Management System (ISO)
 - Supply Chain Management Training (SCM) and contractor evaluation

- Quality Management System Audit Course (ISO)
- PMBOK project management training course
- Calibration and Uncertainty Calibration Course
- Training course on Identification of Goods and Products (Medreseka)
- Learning course on the recognition of marine engines
- Engineering Systems and Technical Processes
- Iso9001-2015 Quality Management System Training Course
- Training Course Requirements for Quality Management - Training in accordance with ISO 10015
- Training Course on Workplace Adult Management System IDS 758
- Customer Satisfaction Assessment Course based on ISO10004
- Customer satisfaction training course based on ISO 10002 standard
- Training course on the requirements of the Fayyad Fellowship Compliance Standard
- MSP course
- TERIZ course
- Teaching and teamwork training course
- Training course on monitoring and process analysis
- Problem Solving Training Course and its Tools
- Process Management Training Course
- Training, familiarity with statistical techniques based on the standard ISO / TR 10017
- Marine Equipment Classification Course
- Training courses for ship construction and equipment
- Training Course describes the requirements of standard 17020
- Training course on color inspection and preparation of level 1 and 2
- Sample study course for admission based on ISO 3950 and 2859 standards
- Training Course on Industrial Product Inspection (Import & Export)
- Training course on inspection principles and technical reports
- Professional Inspection Ethics Course
- Classification Surveys on New Building and Existing Vessel
- Statutory Surveys on New Building and Existing Vessel
- Towage Surveys

Teaching Experience

- Understanding the application of polymer parts in a vehicle
- Training on quality control of rubber products
- Spc training course
- SQA Training Course
- Marine equipment rating course
- Standard Course 17020
- Sampling period for product acceptance
- Occupational Health Work Environment (5s)
- Occupational Health and Safety
- Assessment period of the defense colleagues network
- Idea Workshop to Product
